

Wei Lab's GI solution targets gastrointestinal diseases by restoring the integrity of the biochemical digestion process with 4 products: Spring Juice, Spring Capsule, Luminen and Pearl Capsule. The Spring Juice stimulates the repair of the esophagus and stomach mucosal lining, which restore the gastric glands' normal secretion of digestive enzymes, intrinsic factor and gastrin which restores the normal stomach acidity. The Spring Capsule complements this process by increasing the blood supply to the stomach, strengthening the esophageal sphincter muscle and activating gastric nerves for better regulation of secretion and contraction. Luminen optimizes food acidification, sterilization, and digestion by improving the pylorus' function in regulating the movement of chyme from the stomach into the duodenum. Lastly, the Pearl Capsule increases the secretion of pancreatic enzymes into the small intestine. With the treatment of these 4 formulas, patients can experience significant improvement in 1 week. Conditions can be resolved with 1 month of treatment.

Case: Successful Treatment of Acid Reflux (GERD)

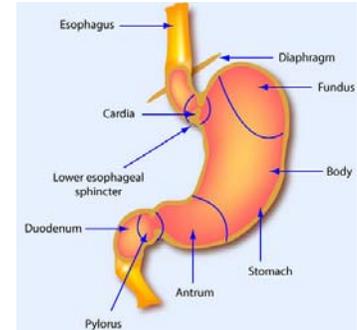

Russel Sher, D.C., Asheville, NC April 2014

Age 44 male diagnosed with Gastroesophageal Reflux and was taking Prilosec to control acid. Using a regiment of Wei Lab's Spring Formulas, Lumenin Capsules and Pearl Capsules with consistent chiropractic adjustments, patient was **symptom-free in 1 month**. Results have been sustained.

Case: Successful Improvement of Constipation and Sugar/Starch Intolerance

Tom Messinger, ND, RN, Portland, OR, April 2014

Age 47 female complained of poor GI health with symptoms of difficult/infrequent bowel movements, constipation, increased frequency/unpredictable food reactions, sugar/starch intolerance, and heartburn due to specific foods. She began using Spring Juice, Spring Capsule, Pearl Capsule and Formula B (similar function to Lumenin). Her sugar/starch intolerance were **completely eliminated after 4 weeks**. After starting on a **kidney and liver** treatment also from Wei Laboratories consisting of Brown Juice, Xcel Capsules and LC Balancer for 2 weeks her bowel movements became normal. All of her GI symptoms completely improved and sustained.

Case: Treatment of Severe Hip Pain, Acid Reflux and Stomach Ulcers

Brian Hess, DC Culpeper, VA, May 2011

Age 55 active male who actively surfed and danced complained of a **5 year old bilateral hip pain**. Patient had tried various therapies and was considering quitting dancing because of restricted mobility and pain. He reported low energy, stiffness, periodic stomach pain, and had a **history of acid reflux and stomach ulcers**. Upon examination, his hips felt cold with hardening of the hips and surrounding muscle tissue. Patient's hip pain was related to his acid reflux condition.

After week 1 of treatment using Wei Lab's GI formulas, WHITEE patch, and LC Balancer his hips felt more pain, especially at night. **By week 2, the hip pain had subsided**, and he reported an increase in energy and flexibility. On week 3, his Tango instructor commented on his improved flexibility. On week 5, patient has no hip pain, and can do a 180-degree contra-body twist in his dance class. He has increased energy and is **free of digestive symptoms**. Finally, he reports better sleep now than he has had for many years. Results have been sustained.

Case: Successful Treatment of COPD Complicated with Acid Reflux

Jack Kucheran, DC, Calgary, Alberta, Canada, November 2011

Age 75 female patient with COPD and Acid Reflux reported **chronic productive cough (thick grey phlegm)**, exhaustion, fatigue, shortness of breath, difficulty breathing, weakness, acid reflux, poor digestion, swollen ankles, abdominal cramps, stomach pain, **difficulty walking 1-2 blocks**, and a need sleep in the afternoon. Patient's COPD condition was related to her acid reflux.

Patient was prescribed Soup A, Soup B, LC Balancer for 2 months to treat the COPD. Spring Juice, Spring Capsule, Formula B and Pearl Capsule were prescribed for 3 weeks to treat the Acid Reflux at the same time to prevent any complications. **After 3 weeks, patient had no acid reflux**, improved digestion and energy. At the end of the 2 months treatment, **patient is able to walk 1 mile** with cough 95% better and disappearance of all other symptoms.
